

I am definently a proponent of XM Satelitte Radio and it's traffic and weather. 1st of all, it is instant, I do not have to wait to cycle thru all of the other news. It is specific to my current driving area and I know exactly where the channel is, I do not have to channel surf to find it in a new city. Please reject the NAB's petition 04-160 and keep the satelitte radio working for me.
